

Envoy

SONOCO
THERMOSAFE

Our **Envoy** series of cost effective shippers feature refrigerated, CRT, and frozen solutions in summer and winter configurations to maintain temperature control from 24 hours to 120+ hours.

Our **Envoy Global Platform** maintains strict temperature control and optimizes inventory utilizing only 4 shippers and five refrigerants to create 20 different solutions. These prequalified shippers are ideal for shipping pharmaceuticals, clinical treatments, and diagnostic samples.

ENVOY DIRECT

Envoy Direct Solutions are simple, economic designs providing cost effective temperature control for regional and national distribution of pharmaceuticals direct from the pharmacy.

- Ideal for next day delivery
- Simple and fast assembly drives operational efficiencies
- Uses minimal components with seasonal conditioning requirements to simplify inventory management
- Optimized dimensional weight reduces transportation costs
- Designed to withstand real-world ambient temperature environments
- 2 model classes assure the appropriate level of product protection for your needs
